

# Creating Custom Materials in Inventor 2008/2009

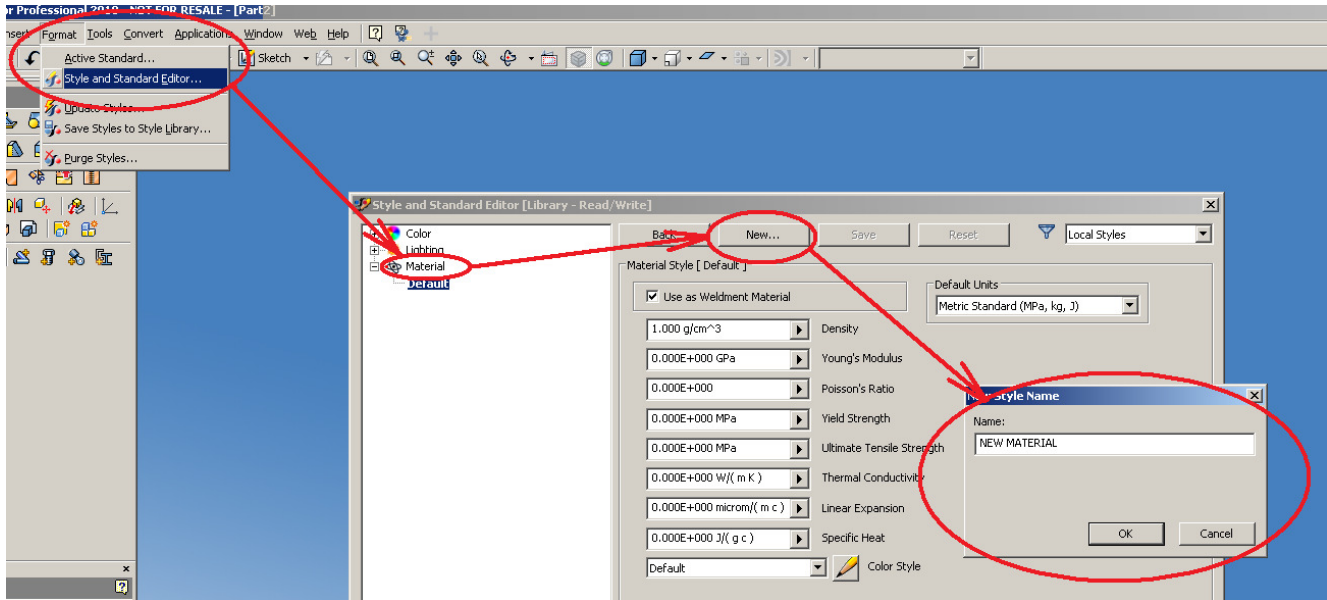

This White paper will guide you through a basic New material creation in Autodesk Inventor 2008/2009

Intermediate Inventor Users, Cad Manager

The first step, ensure that your project file has it's style library set to **yes**

In 2008/2009, From a part file, click on **Format - Style and Standard Editor – Material** (expand material and click on any material) – **New**, then fill in the new name and click on OK. Fill in the materials physical properties and click **save**.

The best advice is to save this part as a template. Default locations below;

C:\Program Files\Autodesk\Inventor (version #)\Templates (on Windows XP)

C:\Users\Public\Documents\Autodesk\Inventor (version #)\Templates (on Vista)

C:\Users\Public\Public Documents\Autodesk\Inventor (version #)\Templates (on Win7)
