

Turn CADmep Service Template 'On/Off'

Ever turned it off by accident and can't figure out how to turn it back on again?

It's an old one but it's a good one – Not being able to turn a menu on again. No problem, use the **USESYSTEMS** command. You may have to do it twice before it pops up on the screen as the first time you do it might turn it off.

USESYSTEMS to turn Service Template menu on/off

If you would like to turn the toolbars on or off use the **TBAR** command as well...
