## **Modifying the Report Table Style**

## **AutoCAD Electrical**

It's easy to customise the style of the reports into drawings. When you run a report, you can insert the report into a drawing or several drawings. The report information is annotated into an object linked table meaning that it will update if the data within your project changes. The table style used is defined within the report dialogue:

Table Style		
ACE-METRIC (TableStyle)	$\sim$	Browse

The table style can be modified either within the specific drawing or within the "master" table style drawing. If the changes are made within the "master" TableStyle.dwg, all new reports will adopt the styling defined.

The "master" table style is held in a drawing called **TableStyle.dwg** located within the directory: C:\Users\<<user name>>\AppData\Roaming\Autodesk\AutoCAD Electrical 20##\R2#.#\enu\Support

Type TABLESTYLE at the Command line or select Home ribbon tab > Annotation panel >  $\Psi$  >

A,	Arial	Ŧ
н	Standard	-
12	Standard	-
₽	ACE-METRIC	-
Ē	Annotation	

Highlight the table style and select Modify...

<u>i</u> tyles:	Preview of: ACE	METRIC		
ACE-METRIC				Set Current
ACE_TABLE_1				
Standard		Title		<u>N</u> ew
	Header	Header	Header	
	Data	Data	Data	Modify
	Data	Data	Data	
	Deta	Data	Data	Delete
	Data	Data	Deta	
	Data	Data	Data	
	Data	Dete	Deta	
	Dete	Dete	Deta	
	Data	Data	Data	
_ist:				
All etylae	~			

The table has 3 different cell styles: Data, Header & Title.

For each cell style, you can alter the cell margins, cell fill colour, the line weight, line type, line colour, text font, text height, text colour, text angle and table direction. The text alignment is defined within the report dialogue and associated \*.set file.

Page 2 of 2

Select table to s	tart from:		Data	<ul> <li>I</li> <li>I</li></ul>
General			General Text Bo	orders
Table direction:	Dow	n v	Properties Fill color:	□ None ✓
			Alignment:	Top Center 🗸
			Format:	Text
	Title		Type:	Data 🗸
Header	Header	Header		
Data	Deta	Deta	Margins	
Deta	Dete	Deta	Horizontal:	1.5000
Deta	Deta	Data	Vertical:	0.5000
Data	Data	Data		
Deta	Deta	Deta	Merge cells on ro	ow/column creation
	Deta	Data	Cell style preview	
Data	Data	Data	Da	ta Daba
Data Data				

As an example, to change the horizontal cell margin alter the value shown:

Repeat the process for each cell style i.e. Data, Header & Title.

Cell styles Title Data Header Title	•	
Create new cell style Manage cell styles	lenter	~
Format:	Text	
Туре:	Label	$\sim$
Margins		
Horizontal:	1.5000	
Vertical:	0.5000	
Merge cells on row/o	column creation	
Cell style preview		
	Title Title	

To change the text style, select the *Data* cell style > *Text* tab and then choose the font you wish to use:

Cell styles	
Data	<ul> <li>Image: Second sec</li></ul>
General Text Border	8
Properties	
Text style:	ТАНОМА 🗸
Text height:	2.0000
Text color:	ByBlock ~
Text angle:	0

Repeat the process for each cell style i.e. Data, Header & Title.

Close Select to save the changes.

SHEET	DESCRIPTION	INSTALLATION	LOCATION
